# FIFA-CERTIFIED FOOTBALL GOALS TYPE 1 COMPLETE SETS FOR YOUR STADIUM

## Professional international football goals, FIFA Quality certified. Recommended by FIFA for international matches.

In accordance with current FIFA and DFB requirements, the goal frame (100 × 120 mm) has a wall thickness of 2.5 mm and features our integrated milled net attachment system. The goal corners, including internal corner reinforcements, and the crossbar are fully welded. The goalposts are connected to the crossbar using plug-in connectors, providing exceptional stability while still allowing the goal to be dismantled for storage.

With our integrated milled net attachment system, the net hooks are incorporated directly into the goal frame. There are no protruding, screwed-on or welded-on net hooks, making the net easier to attach and remove while significantly reducing the risk of injury. The net hooks are an integral part of the aluminium profile.

The FIFA-certified set also includes our Flex net retention system. It can be quickly and easily inserted into the groove of the goalposts and prevents the net from being pulled out during play.

All goals are equipped as standard with a connecting profile for the ground frame. Three different ground frame options are available. The tensioning rods included in the set are made of robust hot-dip galvanised steel and feature a guide roller at the top for quick and easy net tensioning.

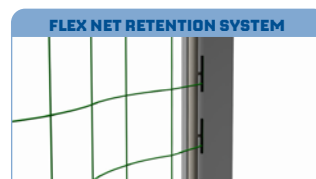

**The FIFA certification of the goal is only valid for sets with the accessories listed below. \*Type 1 goal TÜV-certified.**

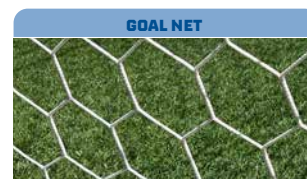

With a tension pulley

Secure fastening of the nets

# FIFA-CERTIFIED FOOTBALL GOALS TYPE 3 COMPLETE SETS FOR YOUR STADIUM

**Fully welded or demountable football goals, FIFA Quality certified. Recommended by FIFA for international matches.**

Professional football goals, size 7.32 × 2.44 m. Manufactured from high-quality aluminium profiles and available in either a fully welded or demountable design. TÜV-tested in accordance with DIN/EN 748. 8-year warranty. Our TÜV-tested FIFA training goals are manufactured from high-quality aluminium profiles. Their dimensions comply with current FIFA and DFB requirements. The oval goal frame profile measures 120 × 100 × 2.5 mm, while the ground frame is made of a rectangular aluminium profile measuring 80 × 40 × 3 mm. The 60 mm diameter net supports provide exceptional stability. Together with our integrated milled net attachment system in the goal and ground frame, they ensure an optimal fit of the net.

**Goals featuring our integrated milled net attachment system offer a range of unique advantages:**

1. Integrated milled net attachment in the goal and ground frame:
  - Precise positioning of the net
  - Easy attachment and removal of the net
  - No follow-up costs caused by loose, broken or missing net hooks
2. The net supports are recessed into the goal frame before being welded in place, ensuring exceptional stability.
3. The corners of the goal frame are reinforced with internal corner connections!
4. Provisions for anchoring are included as standard.
5. The lower ends of the upright goalposts are closed with protective caps.
6. Optional: with 100 kg counterweight

**The FIFA certification of the goal is only valid for sets with the accessories listed below. \*Fully welded goal TÜV-tested.**

**WEIGHT WITH WHEELS**

Counterweight 100 kg, wheels Ø 260 mm

## 1. LEAGUE EVERY DAY

# GROUND FRAMES FOR EVERY REQUIREMENT. THE CHOICE IS YOURS.

### GROUND FRAME „COMPETITION“

The ground frame is fully integrated into the turf. As usual, the net can be attached to the ground frame, which is recessed below the turf surface, making it virtually invisible. Unlike conventional ground frames, which rest on the turf during play, our solution folds down into a recessed channel in the ground. For turf maintenance, special fixing points can be released, allowing the entire ground frame to be folded upwards as required. When the pitch is not in use, the channel housing the ground frame can be closed to protect it from dirt and debris.

### GROUND FRAME „PLAYERSAFE“

Padded ground frame made of an 80 × 40 mm aluminium profile with integrated milled net attachment. Robust EPDM padding with hollow chambers provides effective impact absorption and also prevents accidental removal of the ground frame.

### GROUND FRAME „STRONG“

Fully welded ground frame with side supports made of round aluminium profiles and a rear crossbar made of a rectangular aluminium profile with welded eyelets for net attachment. A rod system for securing the net is included.

## ROALER GOAL 3.0 – THE FOLDABLE FOOTBALL GOAL

Ideal for stadium warm-ups, this goal is specially designed for quick and flexible use immediately before the match. Dimensions: 7.32 × 2.44 m; depth: 200 cm.

Perfect for professional training conditions and matchday preparations.

Roaler Goal 3.0

Order no.: 060KL203

# 1. LEAGUE EVERY DAY

For over 65 years, Schäper Sportgerätebau GmbH has been manufacturing high-quality sports equipment.

The outstanding quality and excellent value of Schäper products have earned us recognition far beyond Germany and the German-speaking market. Today, our products can be found in sports facilities, stadiums and arenas around the world. Schäper sports equipment is used at World, European and German Championships, contributing to sporting success at the highest level. From Australia to Venezuela, customers around the globe value the quality and reliability of Schäper sports equipment – because quality has been a tradition at Schäper for more than 65 years.

Dear sports enthusiasts, just as in sport, direct comparison has always been the best way to assess performance – and it is this approach that has convinced our customers in the past and will continue to do so in the future. Whether you are a manufacturer or an athlete, whether you operate in the sports equipment market or compete on the playing field, a fair comparison provides the best basis for making a sound and sustainable decision. We would also be delighted to put you in direct contact with existing customers of our company, allowing you to gain first-hand insight into their experience with Schäper products.
